Queries

- Many people spend too much time on social media without realizing it, which can harm their mental health and productivity.
- Social media addiction is a common issue, especially for younger people. This project helps track how users spend their time on platforms, measure their addiction level and suggest ways to reduce usage, such as setting limits or consulting professionals.
- Social media apps are designed to keep users engaged, sometimes leading to overuse. This project analyzes users' activities, identifies the platforms causing the most problems, and offers specific solutions to help users control their habits.

Importance

Enhance User Engagement: Build a platform that motivates users through gamification, challenges, and personalized interactions.

Support Rehabilitation: Provide tailored rehab plans, progress tracking, and professional consultations to aid users in overcoming challenges.

Enable Data-Driven Insights: Collect and analyze user activity and behavior to optimize system performance and user experience.

Requirements

Notifications

- Each user can receive multiple notifications, and each notification is specific to a single user.
- Notifications keep users informed about updates, reminders, or significant events related to their platform usage.

Platform Interaction

- Users can interact with multiple platforms, and each platform can have many users.
- This feature tracks user engagement across different platforms, helping identify their preferences and usage patterns.

Requirements

User Categories Based on Platform Usage

- High Addiction: Users spending significant time on platforms.
- Assigned a consultant for personalized guidance or advice.
- Low Addiction: Users with moderate platform usage.
- Participate in challenges to encourage healthy habits and responsible platform usage.

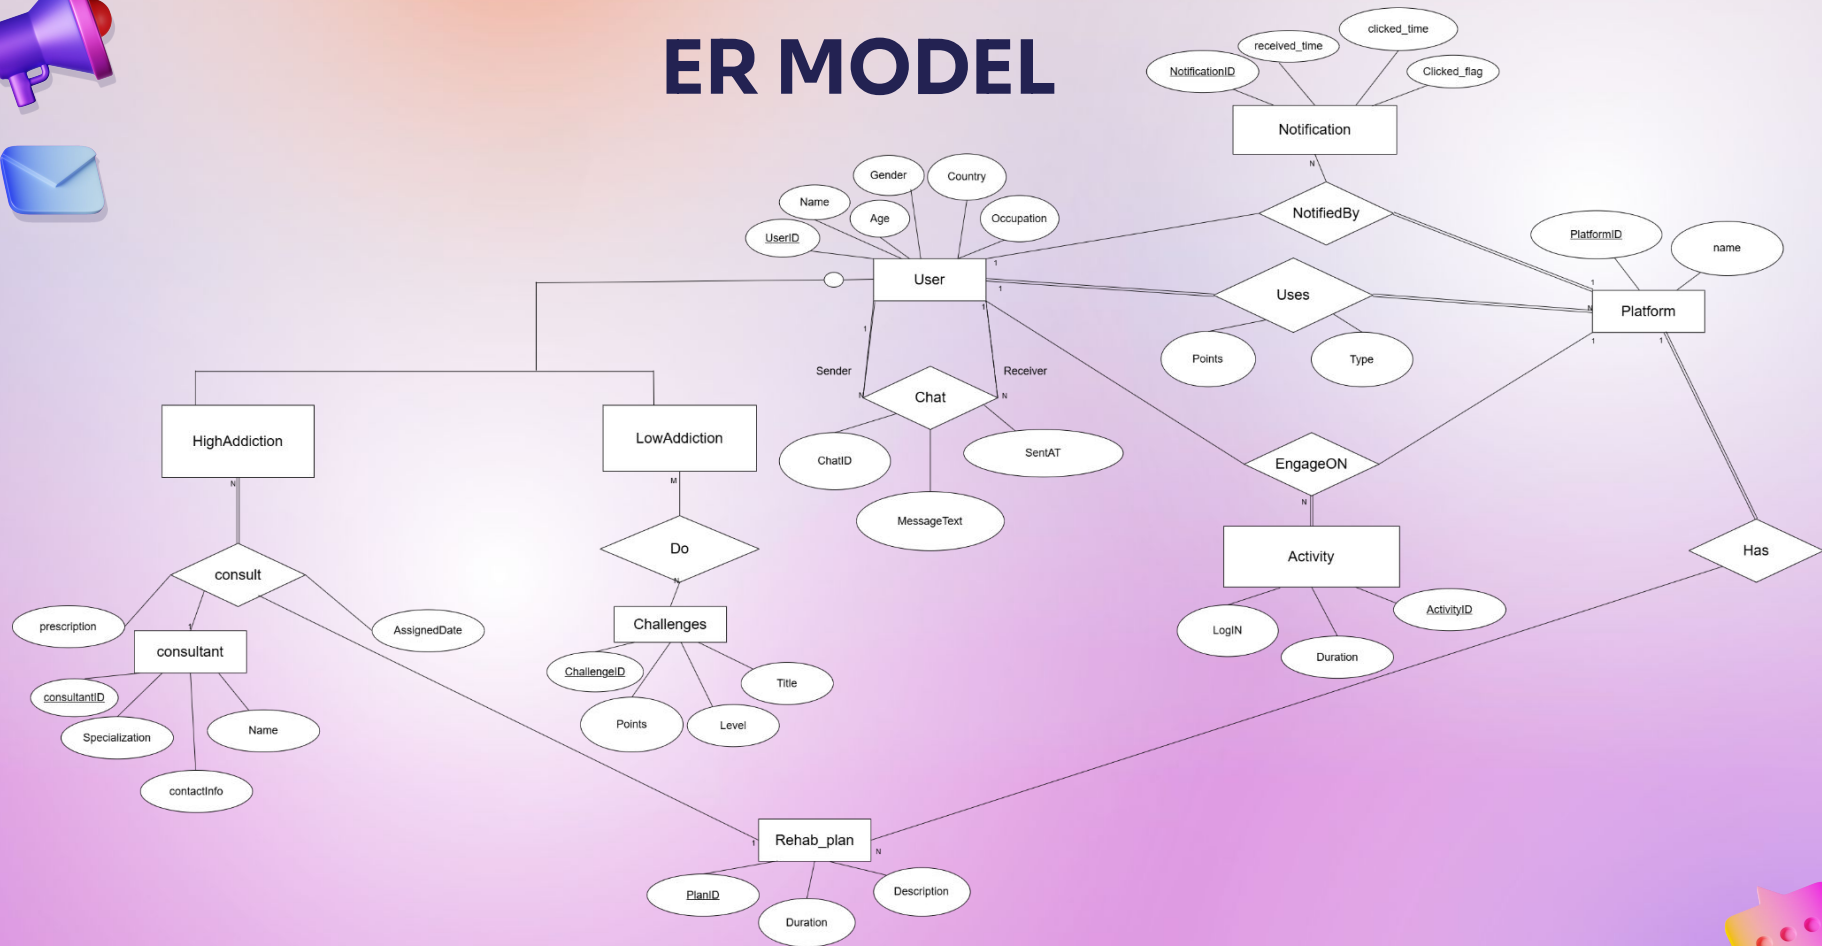

Communication and Addiction Analysis

- Enhance content with concise, engaging captions. Share stories that resonate with your audience. For causes, emphasize your mission. Utilize relevant hashtags to amplify reach
